

SAFETY & CONTROL FOR CRANES + ACCESS + OPERATORS

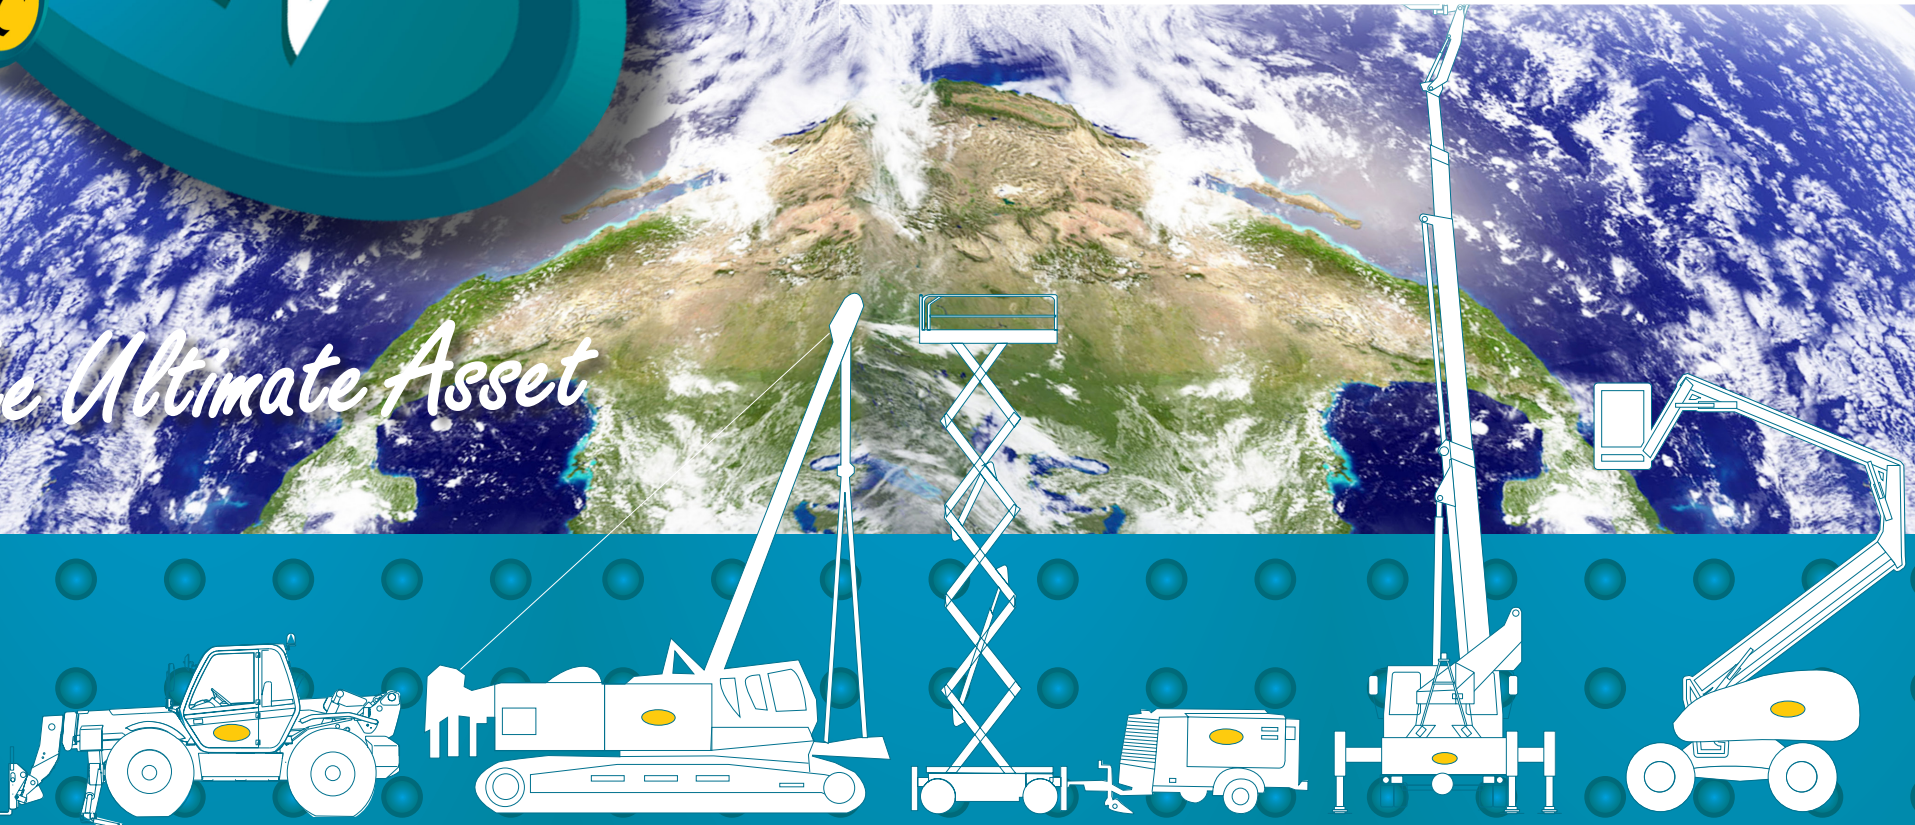

...from a laptop... the future is here now... with remote access control.

Made for Rental

MAXIMISING UTILISATION & SAFETY
WITH GLOBAL REMOTE ACCESS CONTROL

The Ultimate Asset

RELIABILITY REPUTATION SERVICE

Kosran delivers utilisation and profit.

ALEC Construction has a US\$ 1 Billion turnover pa. We are the main contractor on the New Dubai Airport site. We control the machines permitted on site to maximise utilisation. Multiple sub-contractors work the same Kosran controlled machine(s) every day; we then invoice each user separately. We have worked with Kosran for a year; they have provided us with excellent economies, product and service. Contractors need to consider Kosran benefits very seriously.

Daniel Talbot,
Plant Facilities Manager,
Alec Construction.

Stops anyone without training, competence or authorisation, thief, juvenile or employee, from operating your machine and causing malicious, personal or 3rd party damage.

SAFETY

We Stop Un-authorized Use on Site,
Only qualified personnel operate your Machinery.

ACCESS

Monitor machine usage via web site/ smart phone

CONTROL

You decide when your machinery works and who works it.

- Only authorised users use your equipment
- Activation/Deactivation can be done remotely
- PIN Codes control
- Remote monitoring of machine user and operating hours
- Equipment can be shut down when not in use
- Improve productivity
- Increased user accountability
- On time servicing and equipment checks
- Reduce damage/downtime

Kosran Safety Access Control

Technical: The unique feature of the SAC system is that a 'telematic converter' allows the 'keypad pin code' operated 'safety system' to be linked to a 'tracker'. The result is, you can view your operator and machine reports, and control (authorise operators or shut-down) your machines remotely, globally from your Laptop.
